

## **Paint Shop Pro “Projects”**

### **Family Tree:**

Develop a “Family Tree” of your family. You will need family photos and certain information:

1. Birthdate/Deathdate
2. Where they were born
3. Where they lived (start to present/finish)
4. Relationship to yourself

You may use Inspiration or Power Point software to create your “Family Tree.”

### **Tabloid Spoof:**

Tabloids usually have little truth in their articles along with sensationalized photographs. You are to create a “Tabloid” that spoofs tabloids in general. You may want to get a tabloid the next time your or your parents are at the grocery store to get a feel for how they “stretch the truth” and use photographic images for their purpose. I have a couple for you to get some ideas from. You are to get photos from magazines, Internet, etc., to help in developing your “Tabloid.” \*Please let taste and common decency be your guide.

The tabloid will include:

1. Major Headlines
2. Fictional stories combined with photographs you have enhanced/created using Print Shop Pro

### **Halloween Photo/Morphing Activity”**

This activity will challenge your ability to use all the skills we have practiced in using Paint Shop Pro to modify and enhance photographs. You may want to use “Halloween” as your theme (recommended) to complete this assignment. You can get photographs from magazines, Internet, etc. The finished project(s) should demonstrate the skills studied in the course in enhancing photographs and using the necessary software applications.

Suggested Morphing:

1. Angel’s Human Face to his Vampire Face
  2. Situational Transformation (Happy to sad/frightened, etc.)
- We will brainstorm to get more ideas.
